WORRIED ABOUT THE RISKS OF YOUR ASSETS BEING LOST OR MISAPPROPRIATED UPON BECOMING INCAPACITATED OR PASSING AWAY?

Digital Succession Plan - Your secure and client-friendly way of transferring your digital assets to the next generation.

Digital Succession Plan provides the legal certainty your loved ones deserve when transferring your digital assets to the next generation. It blends the mechanism of thousands of years old tradition with leading edge technology and consists of a Panamanian private interest foundation holding your digital assets in secure MPC wallets. If you pass away, your digital assets will be transferred to the next generation using a mechanism that has been tried and tested for thousands of years (fideicommissum). You can choose to opt for a solution enabling a person of trust to access parts of the assets in case you become incapacitated.

You will be able to:

Perform partial or total withdrawals of the assets any time (24/7).

Change your beneficiaries instantly at any time.

Change the name of your foundation at any time.

Dissolve your foundation at any time.

Operate as many wallets under the foundation as you wish.

Swap and stake digital assets at any time.
